

Motivated and detail-oriented Software Developer with a strong foundation in Java and backend development. Skilled in building RESTful APIs, working with databases, and writing clean, efficient code. Eager to apply problem-solving skills and learn new technologies while contributing to the success of a growth-oriented organization.

SKILLS

|                     |                                                                                                                                                                                                                                                             |
